12th International Fine Chemicals Market Seminar

第十二届国际精细化工原料及中间体市场研讨会

12th International Fine Chemicals Market Seminar

September 19-21, 2012, Shanghai

Seminar introduction

In the past over 30 years of reform and opening to the outside world, China has attained marvelous achievements in economic development. But we still face difficulty and challenges, especially the weak global economy. In 2012, the critical juncture in the 12th five-year-plan period, it is especially urgent to address structural contradictions and alleviate imbalanced, inharmonious and unsustainable development.

Since the successful holding of the 1st International Fine Chemical Market Seminar in 2001, the annual International Fine Chemical Market Seminar has more and more become a high-grade international grand gathering with focus of attention.

With painstaking preparations made by CNCIC, China National Fine Chemical Material & Intermediate Association, and domestic and foreign partners, the 12th International Fine Chemical Market Seminar and 2012 Conference of China Fine Chemical Raw Material & Intermediate Industry Association will be held in Shanghai, China's economic development center in September 2012. The organizer of the seminar hopes this summit will further intensify communication between fine chemical materials & intermediate enterprises home and abroad, promote cooperation between these enterprises in a more extensive and intensive manner. Centered on the theme of “**changing methods, adjusting structure, stabilizing development and promoting culture**”, this fine chemical summit will promote foreign and domestic peers to find a cultured way of production development, rich life, and environmental friendliness during the 12th five-year-plan period.

This seminar is estimated to receive over 300 attendees from home and abroad.

Target audience

- Officials from competent government departments in fine chemical

industry in China

- ▣ Management committees and local government officials of related chemical parks in China
- ▣ Senior officers from domestic and foreign fine chemical enterprises and their upstream and downstream enterprises
- ▣ Domestic and foreign leaders in R & D and engineering design
- ▣ Financial investment and securities institutions closely watching the development of fine chemical industry
- ▣ News media

Hotspots & focus

- ▣ Pharmaceutical/pesticide intermediate
- ▣ electronic chemicals
- ▣ New chemical materials
- ▣ Customized chemicals
- Environmental friendly drugs
- ▣ New energy
- ▣ Building chemicals

Product segments

- ▣ BPC and intermediate
- ▣ Silicon series fine chemicals
- ▣ Fluorine series fine chemicals
- ▣ Bromine series fine chemicals
- ▣ Phosphorus series fine chemicals
- ▣ Sulphur series fine chemicals
- ▣ Natural extractive
- ...

Seminar date and venue

- ◆ Time: September 19-21, 2012 (check-in on September 19)
- ◆ Venue: Shanghai

Seminar size

- ◆ ≥300 attendees

Form of seminar

- ◆ Combing full size meetings and small size meetings
- ◆ Combing speeches and in-depth discussions
- ◆ Combing seminars and on-site inspections
- ◆ Combing market, technology, financing and raw material supply
- ◆ Combing domestic and foreign enterprises
- ◆ Combing government agencies, industry players, study, research and application

12th International Fine Chemicals Market Seminar

Organizational Committee

May 3th, 2012

Appendix:

Established in June 1999 and affiliated to CNCIC, China National Fine Chemical Material & Intermediate Association is an organization consisting of voluntary members such as organizations of chemical production, science and research, trading, application, information and universities in this field.

Currently, China National Fine Chemical Material & Intermediate Association has over 200 members, most of which are domestic manufacturers of fine chemical intermediates.

Please log into the website for introduction of China National Fine Chemical Material & Intermediate Association and details of previous seminars (11 seminars have been successfully held)
